

# Reptile Scavenger Hunt Activity

## Materials:

Reptile questions worksheet (pages 2-3)  
18 reptile fact cards (pages 4-8)  
Tape and scissors

## Preparation

Print the reptile fact cards on card stock or brightly-colored paper and cut them apart along the dotted lines.

Make copies of the reptile questions worksheet (2-sided).  
Each student will need his or her own copy.

Hide all 18 reptile fact cards around your classroom where students will be able to find them. You can put them on the back of your classroom door, on chairs, on the computer keyboard, on the sides of student desks, or wherever you like.

**Preview**

the printable version of this worksheet.

You can have the kids work by themselves or with partners.

Don't be afraid to hide the facts in tough places. Kids think it's more fun when they have to search around a little.

## Examples of good hiding spots might include:

- sticking out of a book, like a bookmark
- the back of the classroom door
- lying flat on the bookshelf
- on the back of the teacher's chair
- on the side of your computer monitor

*Have a plan for students who finish early. You may want to have an assignment for them to complete when they're done, or you may have them help other students find fact cards.*

### Scavenger Hunt

## Reptile

Fact Card

1

The smallest snake in the world is the Thread Snake, found in the West Indies. When it is full-grown, it is about 3 inches long.

### Scavenger Hunt

## Reptile

Fact Card

2

Galapagos tortoises are some of the oldest living animals on Earth. One tortoise is known to be over 150 years old.

When a female alligator is ready to lay eggs, she digs a nest in the mud. She lays her eggs in the nest and guards it carefully until her babies have hatched.

Do you know the difference between an alligator and a crocodile? Alligators have wide, U-shaped snouts with a rounded end. Crocodiles have a V-shaped snout with a pointed end.

### Scavenger Hunt

## Reptile

Fact Card

# 13

When a lizard loses its tail, it can grow a new one. This is one way it can protect itself from predators.

### Scavenger Hunt

## Reptile

Fact Card

# 14

A chameleon is a lizard that can change its skin color to blend in with its surroundings.

Reptiles are usually more active in warm temperatures. When the temperature cools, most reptiles slow down or become totally inactive.

Snakes use their tongues to smell their environment.

### Scavenger Hunt

# Reptile

Fact Card

# 17

In Southeast Asia, there are actually flying lizards! They don't fly exactly like birds though. They can flatten their bodies and glide from tree to tree in the forest.

### Scavenger Hunt

# Reptile

Fact Card

# 18

Most reptiles shed their old skin several times each year. They usually leave the old skin laying on the ground. You'll never find a gecko's skin though. A gecko eats its skin when it falls from its body.
